## **MAHEN DISTRIBUTION LIMITED**

Notes forming part of the accounts as on 31 March 2017

### **1 Significant accounting policies**

#### **i. Basis of preparation**

The financial statements are prepared and presented under the historical cost convention, on accrual basis of accounting in accordance with the Generally Accepted Accounting Principles ('GAAP') in India and comply with the accounting standards prescribed by the Companies (Accounting Standards) Rules, 2006 and the presentational requirements as prescribed by the Schedule III of the Companies Act, 2013 to the extent applicable.

#### **ii. Use of estimates**

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent liabilities on the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Examples of such estimates include employee retirement benefit plans, estimated useful life of fixed assets, etc. Differences between actual results and estimates are recognised prospectively in the year in which the actual results are known or materialise. Any revision to accounting estimates is recognised in accordance with the requirements of the respective accounting standards. All assets and liabilities have been classified as current and non current as per the Company's normal operating cycle and other criteria set out in the Revised Schedule III to the Companies Act 2013. Based on the nature of products and the time between the acquisition of assets for processing and their realization in cash and cash equivalents, the Company has ascertained its operating cycle being a period within 12 months for the purposes of classification of assets and liabilities as current and non-current.

#### **iii. Revenue recognition**

Revenue from sale of goods is recognised on transfer of all significant risks and rewards of ownership to the buyer. Net sales exclude sales tax and trade discounts.

#### **iv. Earnings per share**

Basic earnings per share are computed using the weighted average number of equity shares outstanding during the year. Diluted earnings per share are computed using the weighted average number of equity and dilutive potential equity shares outstanding during the year, except where the results would be anti-dilutive.

#### **v. Taxes on Income**

Income tax expense comprises current tax (that is amount of tax for the year determined in accordance with the Income-tax Act, 1961) and deferred tax charge or credit (reflecting the tax effects of timing difference between accounting income and taxable income for the period). The deferred tax charge or credit and the corresponding deferred tax liability or deferred tax asset is recognised using the tax rates that have been enacted or substantively enacted as at the balance sheet date. Deferred tax assets are recognised only to the extent there is reasonable certainty of realisation. Such assets are reviewed at each balance sheet date to reassess realisation. However, where there are carried forward losses or unabsorbed depreciation under taxation laws, deferred tax assets are recognised only if there is virtual certainty of realisation of such assets.
